

## NEPA Rosanna Station Walkway

As part of the rail infrastructure project in Victoria, a brand-new Rosanna rail station was constructed. Built over six weeks, with around 1,000 people working around the clock, this station was operational months ahead of schedule. As a result of this new station, traffic bottlenecks have been greatly reduced, and motorists have been able to travel freely and safely.

Treadwell was engaged to provide the FRP panels used in the passenger walkways and platforms.

### Project Challenges

- Selected material had to maintain anti-slip properties regardless of weather conditions, for user safety.
- The decking panels had to be easily removed, to access the covered infrastructure for maintenance requirements.
- Selected material had to be able to handle high weight loading to accommodate heavy foot traffic.

### PROJECT INFORMATION

Project Category:	Rail Infrastructure
Scope of Work:	Supply FRP decking
Treadwell Products:	SureLine® TreadSLAB® FRP panels

### Treadwell Solution:

1

Treadwell's SureLine® TreadSLAB® FRP panels are constructed with an anti-slip surface, with corrosion resistant properties, making it ideal for this outdoor application.

2

These panels are lightweight for easy installation and isolated panels can be removed for maintenance requirements.

3

SureLine® panels are constructed to withstand high weight loading.

4

FRP is simply fabricated and modified on site. This means there is no need for any hot works permit.

5

Being lightweight and easy to install, FRP is very manageable during construction.

6

Given the nature of FRP, any system utilising it is virtually maintenance free, keeping maintenance costs to a minimum.

**OFFICES**

**ABOUT TREADWELL**

At Treadwell Group, our core business divisions have been developed utilising the latest fibreglass reinforced plastic (FRP) technology. With constant innovation and evolution of our offerings, we grow in competence with each experience in delivering unparalleled solutions to a diversified index of industries which include the water and wastewater, mining, oil and gas, public infrastructure, marine sectors. The progression of our products has been focused on ensuring extended design life in varied applications, enabling us to support our continuing commitment to satisfy and add value to our client's endeavours.
