

Kirkham Park BMX Facility

Kirkham Park BMX, New South Wales – this brand-new BMX facility adds to Camden’s first-class sporting facilities and enables the area to host international level events. Poised to be the destination for high-calibre events, this will also be a training venue for all levels of BMX racing, as well as a recreational venue for the local community. The facility includes an 8-metre start hill, and off-road sprint and recreational areas.

Treadwell was engaged to supply the grating for bicycle access to the start hill.

Project Challenges

- The decking surface had to be uniform, without joint protrusions, to avoid any slips and trips.
- The decking would be subject to heavy traffic.
- Decking would be installed in an elevated structure.

PROJECT INFORMATION

Project Category:	Recreational Public Infrastructure
Scope of Work:	Supply FRP grating
Treadwell Products:	EX-Series® GratEX® FRP Mini Mesh Grating

Treadwell Solution:

- 1** GratEX® FRP grating is constructed as a large single piece panel, and can be installed such that it forms a uniform space, without large gaps between panels, creating a seamless surface.
- 2** GratEX® FRP grating is constructed with an anti-slip surface, providing superior slip resistance.
- 3** Constructed from optimum glass to resin ratio, Treadwell’s FRP is durable and able to withstand heavy weight loadings.

- 4** Being lightweight and easy to install, FRP is very manageable during construction.
- 5** Given the nature of FRP, any system utilising it is virtually maintenance free, keeping maintenance costs to a minimum.
